The Draw XML Data Format (DXF) file is the native file format for importing and exporting drawings. It was initially introduced with AutoCAD R14 as AutoCAD R13 file compatibility format. DXF is used for exchanging drawings between AutoCAD software and other applications. History A number of key features that were introduced with AutoCAD 2000: Introduced the ability to automatically save pages in a document, commonly known as bookmarks. Introduced object and block clipping for visibility purposes. Introduced full scale support for raster image formats, including TIFF, JPEG, GIF, PNG, BMP, and others. Introduced history and undo to make it possible to see a complete series of actions taken on a drawing (like a file version control system). Introduced 'relative paths', which made it possible to move objects around in the drawing even if the path or workspace were different. Introduced wireframe, which allowed objects to appear as wireframes, which enabled highlighting and redlining. Introduced ability to zoom in to any drawing region (this was introduced as a permanent feature in AutoCAD R14). Introduced ability to select all objects in a drawing (this was introduced as a permanent feature in AutoCAD R14). Introduced 'auto-place mode' to draw symbols automatically without the need to place objects by hand. Introduced printing and annotation capabilities, including the ability to print to any printer without a driver. Introduced print preview. Introduced 'insert panel' to provide a new workspace within a drawing. Introduced 'auto-snap to object', which enabled the insertion of snapping points, lines, and arc commands. Introduced absolute paths, which permitted object selection independent of the workspace in which the object resides. Introduced global preferences for the application. Introduced automatic style management with application-wide and per-workspace standards. Introduced ability to hide layers or group layers for better manageability. Introduced ability to apply a geometric style to all objects of a given style. Introduced automated dimension bar insertion, including the ability to hide/unhide dimension bars. Introduced ability to use the round number system, allowing for text and dimension labels to be expressed in fractional values. Introduced ability to save objects as graphic images using GDS, Encapsulated PostScript, and PDF file formats. Introduced ability to find the paths of commands to aid in placing them. Introduced 'rubber band selection', which enabled selecting parts of a drawing using a rectangular area instead a1d647e40b
